

BLEU-latency trade-off on CoVoST2 en-de 300 · gtx, T = 4/6/8/12

Punctuation has no latency knob (it segments below the T budget), so it is one point, not a curve.

It and prefix-match MU sit in a slower latency band — shown, but not matched head-to-head.

Empty x ranges are compressed (break marks on the axis). BLEU tokenisation: 13a

- Full-sentence offline (ceiling)
- Multi-agent loop (ours)
- Causal align (TransLLaMa)
- AlignAtt (Papi 2023)
- Syntactic chunks (SASST-style)
- Prefix-match MU (Zhang 2020)
- Punctuation (no latency knob)
